

The figures appearing in the bottom row below the notes in the first and second lines represent the positions used for playing Bb Trombone with F valve attachment. "T" prefix indicates that F change valve or "trigger" is to be depressed, thereby changing the instrument to the key of F. Approximate F trombone slide locations below are in relation to the Bb Trombone positions - 2 1/4 is slightly below the normal 2nd position, 3 1/2 is halfway between the 3rd and 4th, etc.
